DocShield AI — Investigation Screening Report

Investigation ID: INV-20261022-131343-F44169
Generated (UTC): 2026-10-22 13:13:43

Extracted document fields

Field	Extracted value
Name	Paid To
Date of birth	Not extracted
Document number	Not extracted

Tampering analysis

ELA indicator: 0.44 (heuristic, not a probability)
Metadata status: Missing

Risk assessment

Overall risk score: 30 / 100
Screening status: NEEDS REVIEW

Reasons

- Date of birth was not extracted.
- Document number was not extracted.
- Image metadata is absent; this alone is not evidence of forgery.

Important limitation

This report is generated by a prototype screening system. OCR can be incorrect, ELA can produce false positives, and missing metadata does not prove fraud. An authorized human reviewer must verify the document using trusted sources before taking action.
